

Learn Git Branching

Show Task

1: List Git push arguments -- Expanded!

Instructions

\$ level remoteAdvanced5

\$ hint

Remember you can admit defeat and type in "show solution" :P

\$ delay 2000

\$ show goal

\$ git push origin foo

\$ git push origin main:foo2

That branch name "foo2" is not allowed!

\$ reset

\$ git push origin foo

That branch name "C2" is not allowed!

\$ git push origin foo:foo

\$ git push origin foo2:foo

The remote repository has diverged from your local repository, so uploading your changes is not a simple fast forward (and thus your push was rejected). Please pull down the new changes in the remote repository, incorporate them into this branch, and try again. You can do so with git pull or git pull --rebase

\$ reset

\$ git push origin main:foo

\$ reset

\$ git push origin foo:main

\$ git push origin main:foo

Great Job!!!

You solved the level in 2 command(s); our solution uses 2.

Awsome! You matched or exceeded our solution.

Would you like to move on to "fetch arguments", the next level?

4 Level Remote Tracking

Instructions

level: remote-advanced3

hint

Remember there are two ways to set remote tracking!

delay 2000

show goal

git checkout -b side o/main

git commit

git pull --rebase

git push

Great Job!!!

You solved the level in 4 command(s); our solution uses 4.

Awsome! You matched or exceeded our solution.

Would you like to move on to "Git push arguments", the next level?

Cancel

Confirm

5 Level Merging with remotes

Instructions

level: remote-advanced2

hint

Pay attention to the goal tree!

delay 2000

show goal

git fetch

git merge

I expect at least 1 argument(s) for with git merge

git merge o/main

undo

git merge side1 o/main

I expect at most 1 argument(s) for with git merge

git checkout o/main

git merge side1

reset

git checkout main

git pull

Fast forwarding...

git merge side1

git merge side2

git merge side3

git push

Great Job!!!

You solved the level in 6 command(s); our solution uses 6.

Awsome! You matched or exceeded our solution.

Would you like to move on to "Remote Tracking", the next level?

Level: Push Main

Instructions

level: remote/Advanced1

hint

Remember you can always use the undo or reset commands.

delay: 2000

show goal

git fetch

git rebase o/main side1

git rebase side1 side2

git rebase side2 side3

git rebase side3 main

fast forwarding...

git push

Great Job!!!

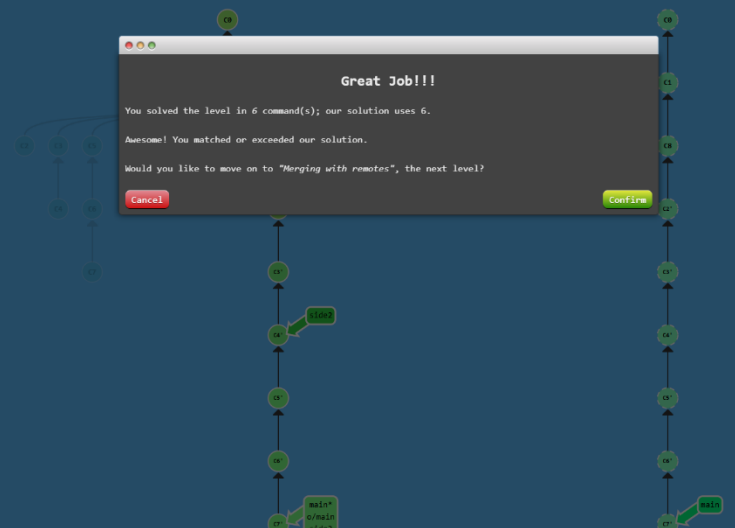

You solved the level in 6 command(s); our solution uses 6.

Awsome! You matched or exceeded our solution.

Would you like to move on to "Merging with remotes", the next level?

Learn Git Branching

Level: Locked Main

Instructions

level: reached8

hint

Make the feature branch from the local main before resetting it back to be the same as origin's main

delay: 2000

show goal

git branch -f HEAD*

That branch name "HEAD*" is not allowed!

git branch -f main HEAD*

git checkout -b feature C2

git push

local branch "feature" set to track remote branch "o/feature"

Great Job!!!

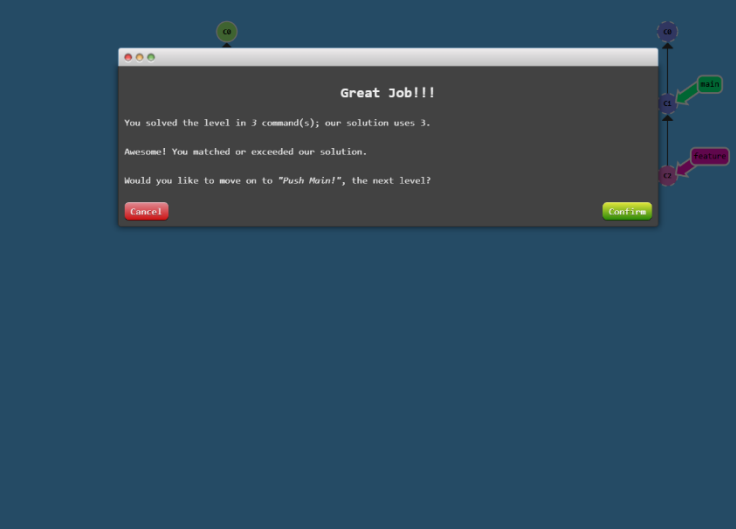

You solved the level in 3 command(s); our solution uses 3.

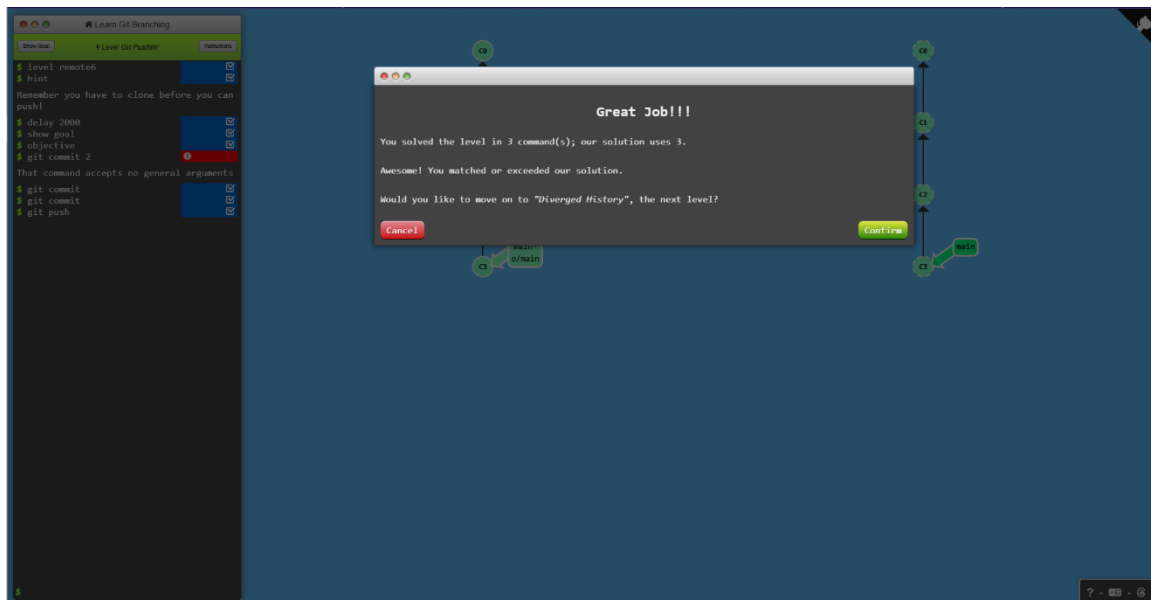

Awsome! You matched or exceeded our solution.

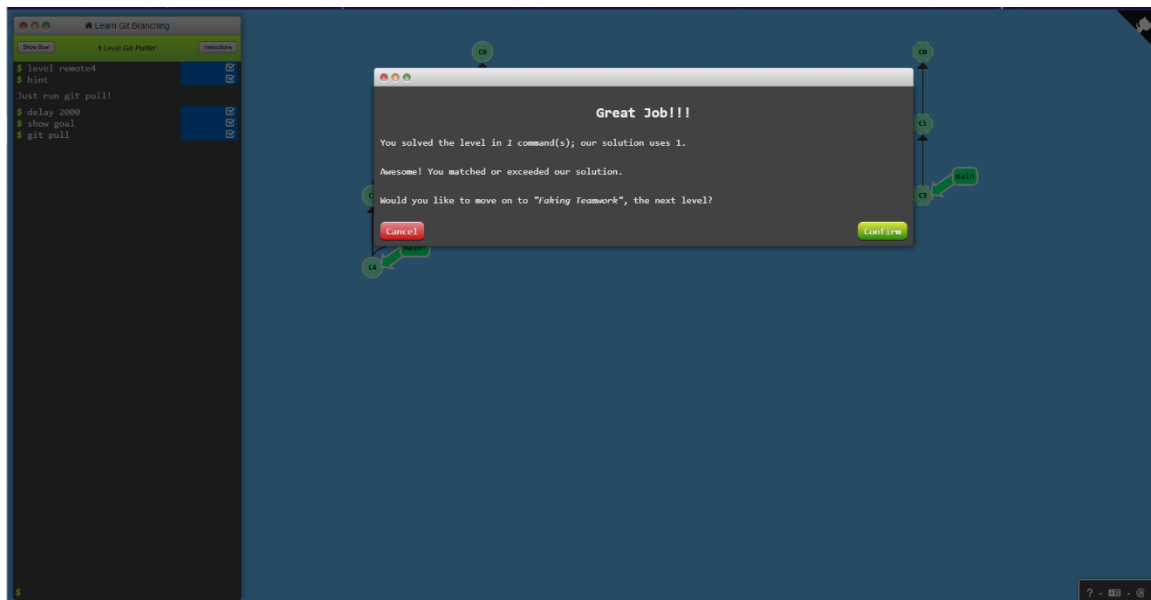

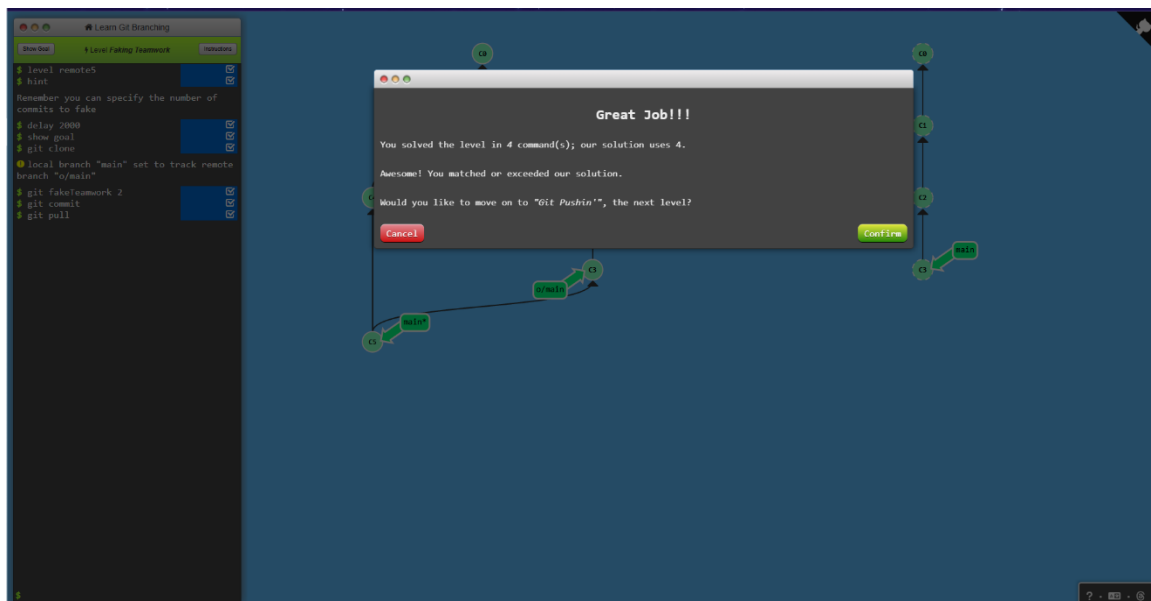

Would you like to move on to "Push Main!", the next level?

Learn Git Branching

Show Goal

Level: Multiple parents

Instructions

```
$ level advanced2
$ hint
Use 'git branch bugfork' with a target
commit to create the missing reference.
$ delay 2000
$ show goal
$ git checkout -b bugfork HEAD~2~2
$ undo
$ git checkout -b bugfork HEAD~2~1
$ git checkout main
```

Great Job!!!

You solved the level in 2 command(s); our solution uses 1.

See if you can whittle it down to 1 :D

Would you like to move on to "Branch Spaghetti", the next level?

Cancel Confirm

Learn Git Branching

Show Goal

Level: Rebasing over 2000 lines

Instructions

```
$ level advanced1
$ hint
Remember, the most efficient way might be
to only update main at the end...
$ delay 2000
$ show goal
$ git rebase main bugfix
$ git rebase bugfix side
$ git rebase -i side another
$ git branch -f main
```

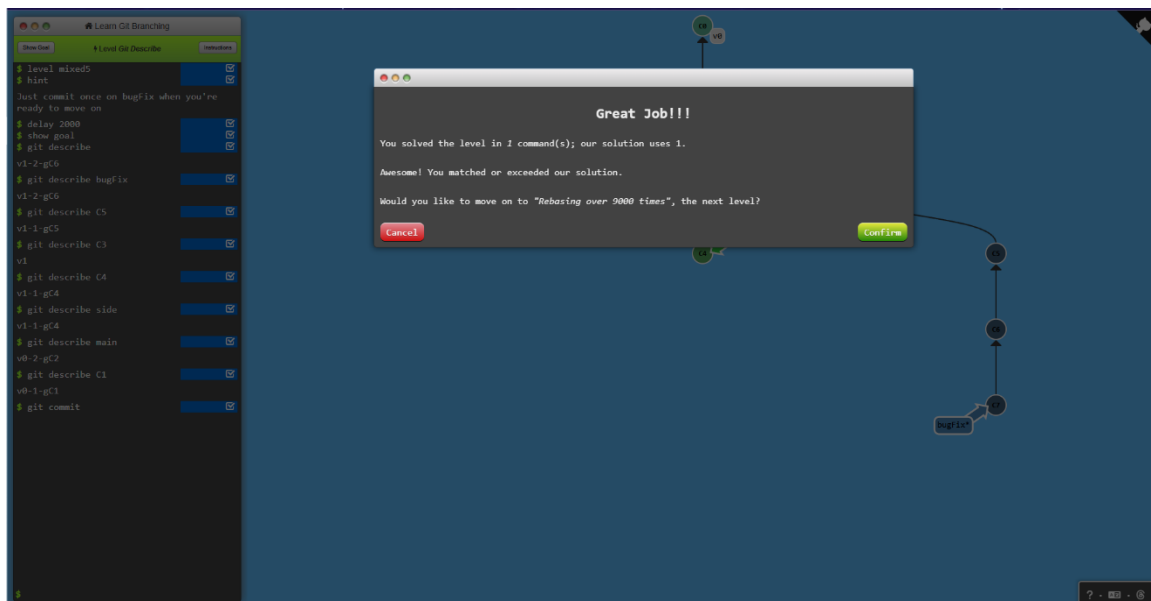

Great Job!!!

You solved the level in 4 command(s); our solution uses 4.

Awesome! You matched or exceeded our solution.

Would you like to move on to "Multiple parents", the next level?

Cancel Confirm

Learn Git Branching

1 Level: Juggling Commits #2

Instructions

\$ level mixed3

\$ hint

Don't forget to forward main to the updated changes!

\$ delay 2000

\$ show goal

\$ git checkout main

\$ git cherry-pick c2

\$ git branch -f HEAD^

That branch name "HEAD^" is not allowed!

\$ git branch -f main HEAD^

\$ git cherry-pick c2' c3

Great Job!!!

You solved the level in 4 command(s); our solution uses 4.

Awesome! You matched or exceeded our solution.

Would you like to move on to "Git Tags", the next level?

Cancel

Confirm

Learn Git Branching

1 Level: Juggling Commits

Instructions

\$ level mixed2

\$ hint

The first command is git rebase -i HEAD~2

\$ delay 2000

\$ show goal

\$ git rebase -i

I expect at least 1 argument(s) for with rebase -i

\$ git rebase -i main

\$ git commit --amend

\$ git rebase -i main

\$ git branch -f main

Great Job!!!

You solved the level in 4 command(s); our solution uses 4.
